

EveryonePrint

Mobile Printing for any organisation

The solution provides the ability for users to connect and use printing services from their own laptops, PCs, tablets or mobiles without any drivers or software needing to be installed, and without having to authenticate to the organisation's network.

This removes the costs, security concerns and support overhead associated with configuration of users' own mobile devices for printing, providing easy access to printers. Suitable for use in any size organisation, offering mobile print services to all users including 'guest' users. The solution can also be used to enable other non-authenticated users to print in places such as hotels, leisure and public places where network access is available but not typically with printing services directly offered.

KEY BENEFITS

- Any device anywhere - enables users to use their own mobiles, tablets and laptops
- Increased security- users do not need to authenticate to the network (web connection only)
- Reduces support overhead for clients/printers
- Ensures all output is accounted/charged for with Pcounter or other print management solution
- Increased convenience and productivity - enables more flexible, efficient working

KEY FEATURES

- Web Print - upload documents via browser from anywhere with an internet connection
- Email Print - print via email (body and/or attachments)
- Driver Print - print normally from all applications using a print driver
- iOS Airprint and Android - print natively from any iOS device, i.e. iPhones, iPads or Android device
- Google Cloud Print - print from Google Apps, Chromebook, Android smartphone or tablet
- Support for any client platform including Windows, MAC, Linux, Mobile/PDA etc
- Supports all printers
- Secure printing & pull printing supported
- Integration with Pcounter for accounting/charging of all users including guests

FIVE WAYS TO PRINT

Web Print

Upload documents using a web browser in popular formats such as Microsoft Office, OpenOffice or PDFs. No drivers or software to install.

Email Print

Send emails and documents to print as attachments via email, from anywhere, including from mobile devices.

Driver Print

One quick and easy self-service setup procedure and users can print directly in the usual way from any application on their own computers, Windows, Mac and Linux, to all available printers.

iOS AirPrint or Android App

Through utilisation of iOS AirPrint or the Android EveryonePrint app users can now print natively from the iOS or Android devices.

Google Cloud Print

Users can print from their Google Chromebook, phone or tablets, Google Apps such as Gmail, Google Docs, Google Sheets, or using any other application or device that supports Google Cloud Print, to the printers you select in EveryonePrint.

AIT Ltd are UK based providers of print & copy software, ID cards and access control solutions.

We pride ourselves on our levels of service working closely with our customers to provide optimised solutions that offer real value for money.

We provide flexible training, onsite consultancy and installation, telephone and web-based technical support, and deployment assistance.

If you can't find what you need please contact our solutions team outlining your requirements and we will do our best to assist you.

EVERYONEPRINT STANDALONE

EveryonePrint can work as a standalone solution enabling mobile submission of print jobs and the ability to securely release those print jobs through the touchscreen interface of your MFP fleet. Giving the benefits of mobile printing and secure pull printing without the need for a print management solution. Ideal in a corporate environment where accountability is not an issue but the ability to submit jobs from mobile devices and ensure document confidentiality is a requirement.

EVERYONEPRINT CONNECT

EveryonePrint also integrates with Pcounter and other print management solutions enabling full print accounting and monitoring of the print output from your users. You can then associate costs and charges to these users to cover print costs.

COST RECOVERY

Users can pay for their prints from their existing Pcounter account, payment card or with their credit/debit card. E-payment capability is perfect for hotels, airports, campus, libraries, wi-fi hotspots, cafés and other similar public places.

TECHNICAL DATA

- Supported servers include: Windows 2003 Server SP2 (32 or 64 bit), Windows 2008 Server SP1 (32 or 64 bit) or Windows 2008 R2 Server (32 or 64 bit).
- Recent generation server CPU processor, such as Intel Xeon 64 or equivalent (see below for important note about performance). Desktop CPU's NOT recommended for production use.
- Minimum 1 GB free RAM memory (minimum 4 GB free RAM memory recommended for higher volume processing).
- Minimum 5 GB free hard disk space for print job spooling and processing (10 GB free disk space recommended for higher volume processing).

EVALUATION AVAILABLE

Installs in minutes, with very simple web configuration & management.

- FREE 60 day trial available by arrangement
