

XPR Enterprise Touchpad Terminal

Advanced Print and Copy Control

XPR Enterprise TouchPad terminals work with Pcounter, an intelligent, flexible, control and monitoring solution designed to manage combined print and photocopy activity. Pcounter is ideal for any organisation wanting to capture information on a pay for service basis - via a charge back mechanism - or for print auditing purposes.

Printers and photocopiers are managed with the XPR Enterprise TouchPad terminal, which acts as a secure print release station. The XPR Enterprise TouchPad terminal supports user authentication by ID number, Network login entry, MIFARE™ and other card technologies, or biometrics. All general administration of the XPR Enterprise TouchPad solution is kept low with an array of automated functions available to keep processes simple.

Additional transaction details for charge backs is possible for nominated users, which includes cost centres, budget or client codes.

A built in 2-port Ethernet Hub allows any host network device to connect directly to the XPR Enterprise TouchPad terminal, eradicating the need for two hard wired network ports. This new feature eliminates further disruption to your wiring infrastructure - saving you time and money.

KEY FEATURES

- Real-time copier control and accounting
- Keypad, ID card or biometric authentication
- Secure print release with pull-printing options
- Configurable display and input prompts
- Pass through mini-hub – no extra network point required
- DDI compliant
- Manufacturer independent
- Touch screen technology

KEY BENEFITS

- Centralised, integrated accounting and reporting
- Single network purse for all copy and print transactions
- Flexible, configurable authentication for secure access
- Vendor independent – all major copier models supported
- ID card independent – most card technologies are supported
- Biometric authentication available

Take control with Pcounter.

TECHNICAL DATA

Connectivity

The XPR Enterprise TouchPad can be connected to any make or model of photocopier, printer or MFD currently on the market

Secure print release and pull printing functionality

Advanced interfacing features are available for some Multifunctional Devices

XPR Enterprise TouchPad Specification

- Dimension 170 x 115 x 52 mm, Weight 330 gr.
- 5" TFT Display Resolution 800 x 500 Pixel with resistive touch
- 2 x 1 Gbit Ethernet ports
- 2 x USB Hi Speed ports (Socket A)
- 12 V DC Power Connector (0.5 Amp max)
- 26 pol. SubDH Interface Connector
- 4 input lines 5 – 24 Volt AC/DC opto isolated
- 1 relay no/nc
- KM Vendor interface
- Cctalk interface
- Integrated ISO 14443A RFID reader with a NXP PN512

CARD SPECIFICATION

The XPR Enterprise TouchPad is compatible with the following card technology: MIFARE™, Proximity, HID, iClass and other card technologies - please contact us for further information

Additionally ID login and network login entry for extra security - we can provide card design as a bureau service or you might wish to invest in a card printing system

If you have a smart card solution in use on your site, please provide specifications and we shall then advise the card's compatibility with this terminal

AIT Ltd are UK based providers of print & copy software, ID cards and access control solutions.

We pride ourselves on our levels of service working closely with our customers to provide optimised solutions that offer real value for money.

We provide flexible training, onsite consultancy and installation, telephone and web-based technical support, and deployment assistance.

If you can't find what you need please contact our solutions team outlining your requirements and we will do our best to assist you.

EVALUATION AVAILABLE

- Live demonstrations or webinar overviews can be arranged
- Units can be provided on a sale or return basis subject to terms.
