

Access Control Solutions

Our state-of-the-art electronic locking systems offer flexible and functional access control with a wide choice of software options. The access control systems are designed to work in a wire free environment so there is no need to hard wire the building, allowing you to keep your original doors and locks in place. This makes installation fast, self contained and straightforward.

An access control system that uses distributed intelligence in both the lock and the key to communicate wirelessly with PC based programming software that makes lock re-programming or re-keying a thing of the past.

Both key cards and locks can be programmed to allow or restrict access to different parts of the building. And the information stored in the key card can be transferred to a computer to provide precise audit trail information about where and when each lock has been used including the date, time and whether access was allowed or denied.

And when combined with the additional functionality provided by the SALTO Virtual Network (SVN), users can achieve 90% of the benefits of a fully on-line system for the cost of a standalone system.

Scalable to cover future requirements without the need for door hardware to be changed.

KEY BENEFITS

- Simple and easy to use, manage and extend
- State of the art solution for less investment
- Unique Salto Virtual Network software allow online access at offline system pricing
- Highly secure
- Excellent monitoring capabilities
- Minimal disruption during installation
- Powerful management information easy to extract
- Offers access control in locations where conventional systems don't work
- Easy to integrate with other systems

KEY FEATURES

- Offline Access with online features
- Variety of locks available to suit all doors/budgets
- SVN software
- Wireless option
- iLockers available
- Granular policy setting
- Full footfall audit trial
- Door usage audit trial
- Real time door updates on battery life
- Control software sits on server but can be pushed out to multiple workstations if needed
- Compatible with multiple card types
- Simple to manage lost/stolen cards
- Directly links to card production software if needed

AIT Ltd are UK based providers of print & copy software, access control solutions and ID Cards.

We pride ourselves on our levels of service. Working closely with our customer to provide optimised solutions that offer real value for money

We provide flexible training, onsite consultancy and installation, telephone and web-based technical support and deployment assistance

If you can't find what you need please contact our solutions team outlining your requirements and we will do our best to assist you.
