

xprSIP Integration Platform

Sharing ID card data between systems using xprSIP.

xprSIP – Systems Integration Platform – is a scalable SQL Server DB providing a centralised processing, staging area and repository for all automation processing rules, configuration and auditing. New processes and configuration changes can be developed and tested offline by AIT, imported into the live site environment and then deployed. Bi-directional data transfer is available between xprSIP and all connected systems.

Using the xprSIP web-browser user interface allows you to manage the integration between various systems and provides a view of data being passed between them. As new applications are introduced this tool enables future development and integration with the existing solution to ensure you can keep full control.

AIT are UK based providers of print and copy software, access control solutions and ID Cards.

We pride ourselves on our levels of service. Working closely with our customer to provide optimised solutions that offer real value for money

We provide flexible training, onsite consultancy and installation, telephone and web-based technical support and deployment assistance

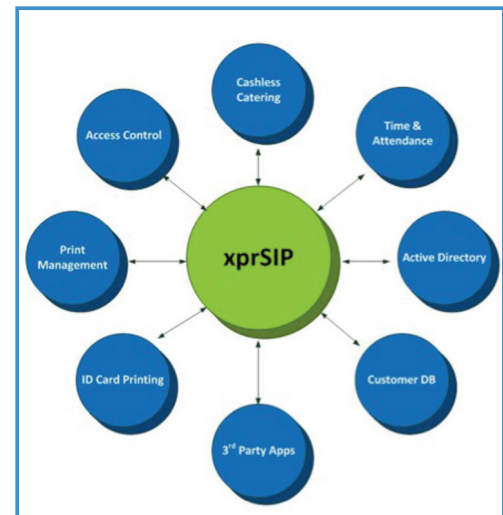

If you can't find what you need please contact our solutions team outlining your requirements and we will do our best to assist you.

KEY FEATURES

- Seamless automation of data transfer between disparate systems
- Web browser based user-interface
- Operator and group level security
- Encrypted passwords for integrated systems
- Audit trail, logging and archiving
- Entire solution stored in SQL Server DB
- Annual subscription license includes support and updates

KEY BENEFITS

- Scalable
- Customized to fit the organisation
- Flexible
- Modular – Add modules to integrate with new software packages
- Save time and money by eliminating manual data entry tasks

IDEAL FOR

- Education and academic establishments
- Public sector and NHS
- Corporates
- ... anywhere ID cards are used

TECHNICAL DATA

Operating Systems:

Windows Server 2008, 2012, 2016

For SQL Version:

MS-SQL Server 2012, 2014, 2016
IIS, PHP 7.2

Browsers supported:

IE, Chrome, Edge, Firefox

EVALUATION AVAILABLE

- Pilots or proof of concept trials are available on receipt of a purchase order. Please speak to one of our solutions consultants for more information.
